CARNATIONS

To obtain good bloom, get your plants in the spring and put them out in the garden. Keep the tops of the long shoots pinched off so as to form compact plants; and nip off all buds that appear previous to the first of August. Take up and pot the plants the first of October and remove to the house, they will soon commence to bloom and continue through the winter. Our collection embraces all the best varieties in White, Pink, Light Pink and Red. Price 10c. each, \$1.00 per doz.

Valuable plants for bedding, the silvery whiteness of the leaves being very effective with colored leaved plants.

Centaurea Gymnocarpa. Silver foliage. The best for bedding.

Candidissima. Dwarf silver-leaved plant; used for ribbon lines.

CHRYSANTHEMUMS

Young plants should be obtained in the spring, and may be either planted in ground or remain in pots, by sinking the pots well below ground; in this way they will require repotting about twice during the season. As soon as the plants begin to throw up shoots pluck off the tops, and repeat this two or three times up to August, 1st, not later, as the buds then begin to form. In September or October those planted in the open ground should be lifted and potted after copious watering the day before. To get the largest and most perfect flowers, allow only one bud, not more than two buds to each shoot; remove all other buds as soon as they form, but exercise care not to injure the shoots.

NASTURTIIUMS

NASTURTIIUM—MIXED COLORS.

Were we asked to name the three most popular flowers that are grown from seed, we should answer unhesitatingly, NASTURTIIUMS, PANSIES, and SWEET PEAS. Few flowers impart such rich "bits of beauty" to the garden as the different types of NASTURTIIUMS. In addition to their use in the garden and on trellises, we would recommend planting the seed freely along the fences, hedges, and walks, or wherever it is desired to have bright colors. YOU CANNOT HAVE TOO MANY NASTURTIIUMS!

NICOTIANA SANDERAE

(NEW HYBRIDS)

The most valuable novelty introduced this year.

This valuable novelty is undoubtedly destined for universal use and everyone can grow it successfully. The large flowers are borne in immense quantities the entire season on bushy branching plants two feet high. The shape of the flower resembles Nicotiana affinis, with a short stout tube. The flowers emit a decidedly delicious sweet scent. Seed sown early in the season and pricked out in the ordinary way that hardy annuals are treated, and transplanted in May or June in the position where they are intended to flower, is all that is necessary. Seed may also be sown in the open ground. There is no plant easier to grow. All colors Mixed 25c. pkt.

This strain embraces not only the enormous blooms of the most perfect shapes peculiar to the new Giant Types, but also the richest, and rarest and most varied colors found in the FANCY STRAINS. We have taken special pains in making up this unrivalled mixture, and we do not believe a better strain can be produced in this or in any other country.

PETUNIA

We have long been celebrated for our magnificent strains of both single and double varieties, which we endeavor to improve each year by careful selection. We have tested samples received from the leading Petunia specialists, and can safely say that OUR OWN STRAIN IS THE BEST THAT CAN BE PRODUCED FROM ANY SOURCE.

NOTE.—It is well-known that the seed saved from carefully hybridized flowers produce but a small percentage of double flowers, the balance being single of an unusually fine quality. The weaker seedlings should be carefully saved, as these invariably produce the finest double flowers,

STOCKS

One of the most popular plants, either for bedding, massing, or pot culture; for profusion and duration of bloom it is unsurpassed. This is one of our specialties, and our seed can be depended upon to produce the largest percentage of double flowers.

The Fragrant, Favorite Flower

Many people now believe that their failure to grow good Sweet Peas of late years is due to the fact that the seed has been produced in a hot dry climate, similar to California. Our customers who have used the English-grown seed declare that it is far superior to anything else they have tried, as the cool, moist climate

of England is favorable to the production of the very best quality of Sweet Peas, while the tendency of stock grown in California is to run to seed too quickly. We are this year offering the genuine English-grown seed, and can highly recommend a trial.

CEMETERY WORK

INCLUDING PLANTING, WATERING AND
CARE OF FLOWERS.

For the past six years we have been making a specialty of this work, and are quite satisfied that no beds looked better, or received more careful attention, than those in our charge. We anticipate a large trade the coming season, and have made preparations to meet it promptly. Those who are kind enough to favor us with their patronage in this line should place their order as early as possible, so that all preparatory work can be done as soon as the ground is free from frost, thus saving much valuable time. Beds prepared early in the season retain the moisture much longer, and are in far better condition than those prepared later when the ground is dry and overgrown with weeds.

We supply all kinds of Bedding Plants : Flowering Shrubs, Roses, Hanging Baskets, Rustic Seats, Vases, and Bulbs for Fall Planting. Pansies may be planted as soon as frost is out of the ground.

We have facilities for placing fresh Cut Flowers regularly on plots, when so desired.

Window Boxes, Vases and Hanging Baskets

We grow a great many plants suitable for filling above, including all the favorite varieties generally used for this purpose. Prices vary according to size and quality, etc.

Cut Flowers and Floral Designs

Our continued success at the various Exhibitions, and the many large orders satisfactorily filled, will testify to our ability and taste in making up Designs and arranging Cut Flowers. We are in a better position than ever before to fill all orders for

**BANQUETS, CHURCH DECORATIONS, WEDDING AND DINNER PARTIES,
FLORAL TRIBUTES, ETC.**

Mail and Telephone Orders receive our most careful and prompt attention.

We pack so as to ship any distance at all seasons of the year in perfect safety.
